Semi-Annual Projection: Summer

About the QuickInsite Report

The QuickInsite report is designed to provide a quick look at a geography defined by a user. It provides an initial impression of a study area through a set of 12 demographic variables, the top 10 Mosaic Segments and 5 Religious Beliefs and Practices derived from the Simmons National Consumer research data.

NOTE: Not all of the demographic variables available in the MI System are found in this report. The FullInsite or ExecutiveInsite Reports will give a more comprehensive view of an area's demographics and ViewPoint a fuller view of its beliefs and practices.

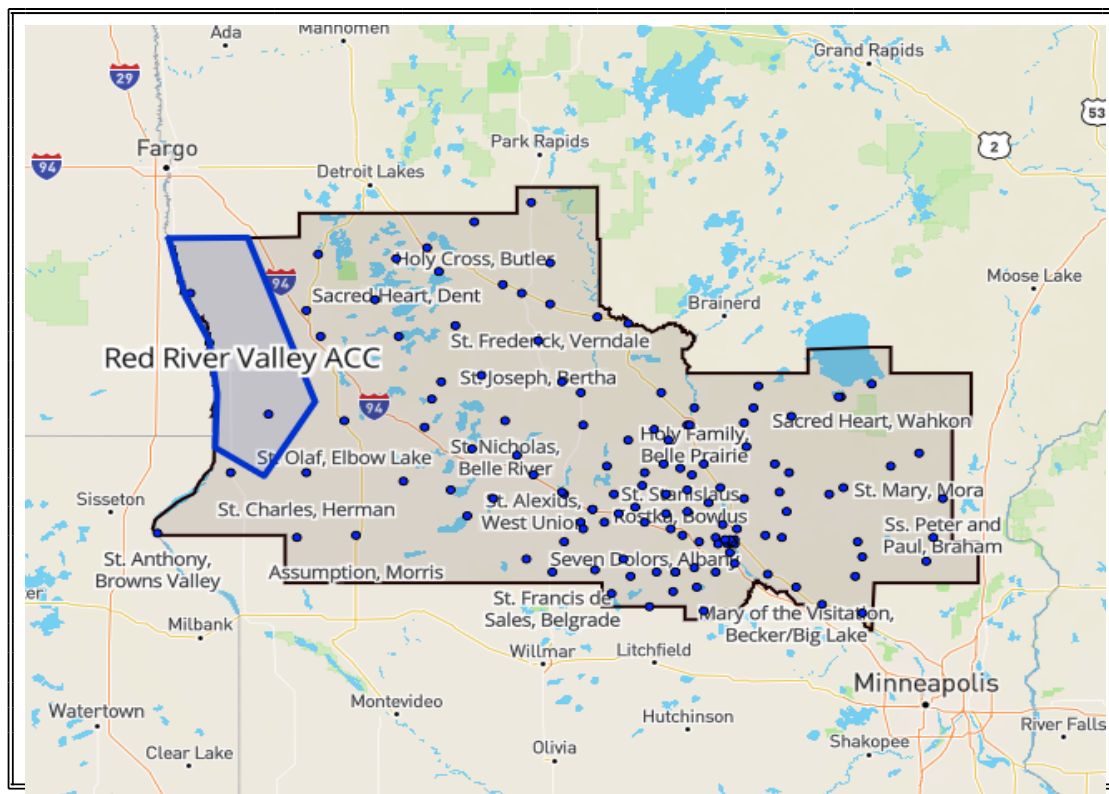

Two Sections

Two reports are provided on the following pages.

- The StoryView Report presents 9 demographic indicators of your study area.
- The ThemeView Report presents greater detail about those 10 indicators but organized around themes.

For more information on interpreting the various data on this report, please refer to the Supporting Information on the final page.

Demographic Descriptions of the Study Area

Study area: Red River Valley ACC

Date: 12/15/2022

Population and Households Theme

Population is the most basic demographic characteristic. It indicates how many persons reside within an area and how that total changes over time. In addition, future population is forecasted looking out 10 years.

Population and Household History with 5 and 10 Year Projected Change

NOTE: Family Household data is not projected out 10 years.

Population and Households Theme

Population and Household History with 5 and 10 Year Projected Percentage Change

Family Households

Family households with children are changing. The traditional married couple structure is evolving into many different family expressions in which children are being raised. These data provide an insight into the family structures within the study area and then compares them to the state.

This table presents both the history and projections for family structures in the study area. Take note of the change column to discern how these family structures have changed and are projected to change in the future.

Households with Children	Actual Hhlds by Year			2010 to 2027 Change	Percent of all Hhlds by Year			2010 to 2027 % Change

Age Theme

10 Year Average Age and Children 0 to 17 Trends

The age history and forecast reflect changes in a community. For example, two demographic trends currently in play are the aging of the Baby Boom generation and the decline in live births in the late 20th and 21st centuries.

Phase of Life

The Phase of Life 10 Year Change graph highlights life phases that will increase or decrease as a percentage of the total population in the forecasted 10 year future.

Phase of Life presents how a community changes and people age through their various life phases.

Phase of Life	Actual Population by Year & Phase				Percent of Pop by Year & Phase

Supporting Information

Correlating the StoryView and DetailView Reports

The Detail View Report presents the important demographic detail behind the Demographic Indicators found on the QuickView page. It is organized around six themes.

DetailView Themes	StoryView Number	DetailView Themes	StoryView Number
1. Population, Households & Families	1 & 3	4. Community Diversity	5 & 9
2. Age	2	5. Financial Resources	6 & 7
3. Education/Career Status	4 & 8		

Interpreting the Report

The QuickInsite report is formatted to help you interpret data at a glance.

Change over time: Several trend tables have a column indicating a change over time. Generally these tables begin with the last census, include the current year estimate, a five year projection and if available, a 10 year forecast. The data in each cell represents a percentage change up or down.

Color Coding: Both the "Change over Time" and "Comparative Indexes" columns are color coded to easily spot any change and the direction of that change.

Change:	Increasing	Stable	Declining
Index:	Above Ave	Ave	Below Ave.

Variable Definitions

Full variable definitions can be found in the MI Demographic Reference Guide. Download it free from the Help/Documents menu located on the map screen of your study area on the MissionInsite website.

[Click to download the QuickInsite Worksheet. To open it in a new tab, press Ctrl when you click.](#)

Indexes: Some variables will have a column called "Comparative Index." An index is an easy way to compare a study area with a larger area. For this report, all comparisons are with the state or states within which the study area falls. The indexes can be interpreted as follows.

- Indexes of 100 mean the study area variable is the same as its base area.
- Indexes greater than 100 mean the study area variable is above the base area. The higher the number, the greater it is above the base.
- Indexes less than 100 mean the study area variable is below the base area. The lower the number, the greater it is below the base.
