About the American Beliefs Study Reports

The American Beliefs Study provides a projection of likely religious beliefs, preferences, and practices for a defined study area. This report is based on the American Beliefs Study national survey, which MissionInsite conducts every five (5) years. While general religious data is available through various organizations, only MissionInsite can provide current local geography projections. This report is based upon the 2021 American Beliefs Study Survey.

The 2021 American Beliefs Study Survey series contains two reports. **ReligiousInsite** provides insights into community beliefs and religious preferences. **MinistryInsite** focuses on practical applications of the 2021 survey. It includes life concerns, reasons for non-participation (or considered nonparticipation) in a religious congregation or community, and a list of preferred ministries or programs. These are based on the specific study area. Customized priority lists address the study area's concerns, program and ministry preferences and more.

The **ReligiousInsite Priorities** Report and **MinistryInsite Priorities** Report capture the priorities of some survey questions based upon strengths of beliefs plus the direction of the beliefs, whether towards agreement or disagreement. These two reports correspond to the full reports.

How to Read the Different Report Types

Four windows provide insight into the respondent's answers.

- Window #1:** Reveals the detailed responses across all options.
- Window #2:** Compares the study area responses to national average responses. For more details, see the last page.
- Window #3:** Compares data between this survey and previous surveys to reveal trends.
- Window #4:** Provides prioritized lists of the topic. This window is only available on certain topics and after applying analytics.

If congregational ministries and programs intend to provide support and service to their communities, knowing the community's concerns is important.

This report analyzes Life Concerns data and displays the 15 highest concerns for your study area. You can use this to discuss ways to engage and serve your community.

Hint: This report compares the percentage of people who had significant concern on the issue to those who had little to no concern on the issue.

Reasons for Non-Participation—Those Outside of a Religious Congregation or Community

People have different reasons for not participating in a religious congregation or community. We look at this from two perspectives: those on the outside and those currently on the inside.

The Outside group indicated they are not currently participating in any religious community and gave reasons why they probably will not participate in a religious congregation or community. The Inside group reflects those who currently participate but have considered discontinuing their involvement.

This data may be uncomfortable but important for congregations to consider if their mission is to connect with the community and maintain their congregations. The topics are segmented by themes: personal life, personal faith, and about the church. We compare each theme to the national average. At the end of this section, the top 10 reasons for not participating in a religious congregation or community display.

You can interpret program and ministry data in three ways.

First, look at how the study area compares to the national average. This indicates if your area needs this program..

Second, consider the Important percentage. If the percentage is above 20%, your study's population would likely benefit from that particular program.

Third, look at the ratio. The ratio is calculated by dividing the Important by the Not Important responses. The higher the number, the stronger the desire for that program, especially if a program has a ratio of "1" or higher.

This table displays how program preferences for this study area rank according to their ratio.

Program Preferences Ranked by Ratio

Hint: This report compares the percentage of people to whom the reasons were at least somewhat important with those to whom they were not important. Those who were "Not Sure" are not included.

Information Sources and Social Media Preferences

Media options for obtaining information today have exploded. The days of a few sources, such as major newspapers or network news programs have been replaced with multiple cable news networks, online news outlets, and social media sources.

To help people sort through this mass of media options, the study asked respondents to indicate their preferences in a series of "forced pairs". The data reveals which sources of information this area prefers, so you can identify the best channels for reaching the intended audience.

Interpreting the Report

The American Beliefs Study reports help you interpret data at a glance.

Comparative Indexes: All variables have a column called Comparative Index, which compares your study area with a larger area. For this report, all comparisons are with the national averages for the data item.

- Indexes of 100 mean the study area variable is the same as its base area.
- Indexes greater than 100 mean the study area variable is above the base area. The higher the number, the greater it is above the base.
- Indexes less than 100 mean the study area variable is below the base area. The lower the number, the greater it is below the base.

Color Coding: The Comparative Indexes columns are color coded so you can easily spot changes and the direction of change.

Index: Above Ave Ave Below Ave.
